Field trialist - Biotek Agriculture USA – Georgia/North Carolina

1. OUR COMPANY

BIOTEK AAA with its worldwide divisions Biotek-Agriculture is a CRO supporting research, development and registration of crop protection products, fertilizers, biologicals and seeds within the major agricultural regions. For more information, please visit our website https://biotek-aaa.com/.

2. JOB DESCIRPTION

We are looking for a highly motivated and experienced Field Trialist to support the planning, execution, and reporting of agricultural field trials conducted in Georgia/North Carolina.

3. MISSIONS

- Conduct and support agricultural efficacy and residue field trials in accordance with GLP and GEP standards, client protocols, and internal procedures.
- Ensure proper documentation and maintain high standards of data integrity throughout the trial process.
- Contribute to the preparation of technical reports in compliance with study requirements.
- Maintain field infrastructure and assist seasonal technicians during field activities.

4. QUALIFICATIONS

- Degree in Agronomy, Agricultural Science, or a related field.
- Experience in field experimentation (GEP experience preferred).
- Good understanding of agricultural trial methodologies and data collection practices.
- Strong organizational skills and ability to work on multiple field activities.
- Proficiency in Microsoft Office Suite; familiarity with field trial software (e.g., ARM or similar) is an advantage.

5. APPLICATION INSTRUCTIONS

Please send your applications (CV+ Motivation Letter) to: contact@biotek-aaa.com with the reference "Biotek Ag USA – Field Trialist".
